

Pratik Chandekar

Software Engineer | Mumbai, India

+91 9075467719 • pratikchandekar280@gmail.com • LinkedIn • GitHub • Portfolio • Blog

Summary

Software Engineer with ~4 years of experience designing and building enterprise-grade Java/J2EE backend systems using Core Java, Spring Boot, Hibernate, REST services, and SQL databases. Strong expertise in scalable microservices, distributed systems, and cloud-native deployments on AWS and Kubernetes. Experienced in designing high-performance backend architectures, debugging production issues, and delivering reliable enterprise software in Agile environments.

Experience

Software Engineer — In-Solution Global | Mumbai

Jun 2022 – Present

- Developed production-grade Spring Boot microservices and REST APIs using Spring MVC, Spring Data JPA, Hibernate, DTO-based layered architecture, and global exception handling frameworks.
- Designed schema-based multitenancy using Hibernate JPA after evaluating database sharding trade-offs, enabling secure client-level data isolation within a single application instance.
- Built real-time transaction monitoring platform using Spring Boot microservices, PostgreSQL, Redis caching, and Kafka streaming, supporting low-latency dashboard APIs.
- Migrated Kafka clusters from ZooKeeper to KRaft mode, configuring a 3-node combined controller-broker cluster and implementing producer/consumer integrations across microservices.
- Implemented secure microservices architecture using Spring Cloud Gateway, Eureka service discovery, RBAC authorization filters, and Nginx load-balanced gateway clusters.
- Implemented GitOps pipelines where Helm commits triggered Argo CD automated AKS deployments, using Jenkins, Docker, and Nexus, with Prometheus-Grafana monitoring.
- Investigated and resolved production defects using log analysis (ELK), distributed tracing, and performance profiling, improving service stability and reducing incident turnaround time.
- Mentored junior engineers, conducted code reviews, and contributed to system architecture and scalability design discussions while working in an Agile/Scrum environment, actively participating in sprint planning, backlog grooming, and architecture discussions.

Skills

Languages: Java, JavaScript, TypeScript, SQL

Backend: Spring Framework (Spring Boot, Spring MVC, Spring Cloud, Spring Security), Hibernate/JPA, J2EE, Servlets, Tomcat, REST APIs, Maven

Cloud & DevOps: AWS(EC2, S3, IAM, Lambda), Azure, Docker, Kubernetes (AKS), CI/CD (Jenkins), Helm, Nexus, Nginx

Databases & Cache: PostgreSQL, MySQL, Redis, NoSQL

Messaging & Streaming: Apache Kafka (KRaft), Event-driven architecture, Publisher-Subscriber patterns, Message partitioning, Consumer groups, RESTful Web Services, SOAP (basic familiarity)

Core Java : Object-Oriented Programming (OOP), Collections, Exception Handling, Multithreading & Concurrency

Testing: JUnit, Unit Testing, Integration Testing

Observability: ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana

Frontend: Angular, React JS, HTML5, CSS3

OS & Tools : Linux, Bash, Git, ChatGPT, Copilot

Practices : Agile/Scrum, Software Development Life Cycle (SDLC)

Certifications

AWS Certified Cloud Practitioner — Jun 2024 (Valid till Jun 2027) — Credential

Education
