Subject: Application for Java Backend Developer Position

Dear Hiring Manager,

I am writing to express my interest in the Java Backend Developer position at your organization. With nearly
years of professional experience designing and developing scalable Java-based microservices using Spring Boot
confident in my ability to contribute effectively to your engineering team.

In my current role at In-Solution Global, I design, develop, test, and deploy production-grade Spring
microservices and RESTful APIs supporting high-availability transaction-processing systems in the banking
payments domain. My experience includes building secure microservices architectures using Spring Cloud Ga
and Eureka, implementing schema-based multi-tenancy with Hibernate JPA, and developing real-time
platforms powered by Kafka, PostgreSQL, and Redis. I have also implemented CI/CD pipelines using Je
Docker, Maven, and Kubernetes deployments on Azure, enabling automated and reliable production releases.

Beyond development, I actively participate in the full software development lifecycle, including code re
performance optimization, troubleshooting production issues, and mentoring junior engineers. I enjoy collabo
closely with product, QA, and DevOps teams to deliver secure, scalable, and maintainable solutions aligned
business goals.

I am particularly excited about this opportunity because it aligns strongly with my experience in Java, Spring
microservices architecture, and API-driven backend systems. I would welcome the opportunity to discuss ho
technical skills and hands-on experience can contribute to your team's success.

Thank you for your time and consideration.

Sincerely,
Pratik Chandlekar
